**Can you create multiple accounts on instagram**

By default, when you post a photo to Instagram, it's visible to every other user. If you add a hashtag to your photo, such as say, #landscape or #selfie, anyone looking for that hashtag will be able to find it. Although this default works if you're a photographer or a brand, some people may feel a little too public, so let's see how to make your Instagram account private. Make Your Account Private Go to Instagram and go to your profile page. In the upper-right corner, click the Settings icon. This will take you to the Settings screen. At the bottom, flip the Personal Account button. Now only your Followers can see your posts. You'll also need to approve anyone new who wants to follow you. Approve New Followers When someone new tries to follow you, they'll send a Follow Request. The next time you sign in to the app, you'll get a notification. Tap the heart icon to see it. At the top of the Notifications screen, you'll see Follow Requests. Tap an area to view it. You can then Confirm or Delete it. What's the deal with someone who has multiple accounts? By itself this is fine, but what about using one of these accounts to ask an incomprehensible question, and then using one or two other personas to answer a question/start a discussion, and provide yourself with the best answer to an equally incomprehensible reply? A waste of everyone's time, or is it just mine? Is there anything you can do? Should I ignore it? Does this happen often and I haven't noticed? I've been stupid into getting into discussions with this guy. We scoured the internet for Instagram accounts that really caught our attention and this is what we got. Some of them are big names, others are small, but they are all very talented. We specifically don't just target well-known accounts because there are so many out there. We're looking for well-composed shots, the overall feel of their portfolio, people who look good, and often use Instagram. Some accounts are abandoned solely because they cover too many subjects. Landscape Photographer/ City Sserkan34 - This person is a professional nature photographer who took some truly incredible shots. He does landscapes, cityscapes, and more. He's a Turkish photographer and has over 80K followers. We found him in an accident but we're glad we did. He uses colors and textures very well, and a lot of his photography is rather real. He must be someone to check on. Appletreeroad\_luke - A freelance photographer from Sydney who did some very good work. The use of contrast and juxtaposition is really interesting. Many of his photos use textures that almost makes the photo look like a painting. She only has 3K followers but we hope to help lump it. William\_patino - Another Australian photographer who did some great landscape shots. His style is one that often appears in nature photography, including the use of slow exposure to capture movement and high color saturation. High. around 23K followers and continue to grow. What's wrong with Australia and nature shots? I see you Peter Lik – where is your Instagram? Curious2119 - This man provides medical supplies for a living and takes photos of rural areas while he is away. He took photos around Wisconsin and Minnesota, mostly. He has over 500K followers; for a delivery man he sure has a good eye for a well-orchestrated shot. NASA – These may not be landscapes/cityscapes, per se, but they are really very cool. They post everything from planetary images to nebulae. They, surprisingly, only have about 300K followers. It's true what they say: We don't support NASA anymore... Action Photographer Calibertrucks - This is a skateboard truck company that has some great action shots of people riding with their gear. These people take the composition of their action shots to a level that doesn't reach many skateboarding photographers. They are really good at capturing unique positions for each action shot as well. One of the people who helped run the company was a professional photographer so it's no surprise. They have about 10K followers and are based in Southern California. Surfinglife – Some nice surfing photos here. Who doesn't like a good shot from inside the waves? They also have a pretty good sense of humor. Surf Life is an Australian surf magazine, outside Queensland, that has been around since the 1980s. We swear the Australian government didn't pay us to showcase so many of their artists. They have over 40K followers. GoPro - GoPro is a premium action camera brand used by extreme sports fans around the world. Their Instagram has some really cool shots of exotic and unusual settings. Their cameras are sold in more than 50 countries. They have over 1 million followers, probably because their reach and subject are very diverse and interesting. Red Bull – People who jump off the edge of our atmosphere obviously have a pretty cool Instagram. The best thing about their Instagram is that it includes a variety of action shots, such as a GoPro. They have nearly a million followers, most of them completely energetic. Their photos are often intense and capture the peak of the moment when a person makes a leap into being forgotten. Xgames - X Games has dirt bikes, rally cars, skateboards, winter sports, and almost anything extreme (imagine that). They post some great videos on their Instagram so you can watch when it's not on the tube. One of the coolest things about this account is seeing candid shots of your favorite extreme athletes that you haven't necessarily seen anywhere else. They just broke 200K followers. Photographer Portrait Nicolelhill - Girl take very nice pictures of beautiful girls... She took pictures of other things too, but we couldn't get past the pretty girls. She's a professional photographer in Southern California and seems to specialize in high fashion and beautiful settings. His style is raw and celebratory. Doing mention the pretty girls? He has more than 6K followers. Luisgarvan – This man does portraits that are usually black and white and captures extreme contrast and angular lighting. His portraits are almost poetic in style and appear Gothic, or almost old-world. He is based in Mexico and has less than 1K followers. We don't care if anyone finds out, he's awesome. Koci – This person also does black and white portraits but with a little more experimental aesthetic to them. The use of shadows and silhouettes attracts attention. He has a s considerable following, at over 175K followers. His photographs almost all look as if they are from the 1950s or earlier. He is currently behind a project called Out of the Phone, the publisher of mobile photography books. Mrpimpgoodgame - Who would have thought one creepy smile over and over could make you thousands of followers? We will, because it's awesome. This guy used to take pictures of himself and it was funny. She has over 100K followers (I know, right?) and featured in Vice magazine for her Instagram. Gawker calls it the only Instagram account that has to be intrusive. \_gabrielflores - This person does more than just portraits, like most of these people, but we especially love his portraits. She has a charming raw style, and she uses mirror images/subjects to contrast well. Many of his portraits are far from the subject and capture movements or moments of mental reflection. He seems to use color sparingly but with intent. He is based in Brooklyn and has almost 60K followers. Bands Unknownmortalorchestra – This Portland-based band took some of the more artful/bizarre photos we found. It's all good to take photos of your tour van and such, but you have to include some weird one as well. Their photos often seem psychedelic and washed out, in a good way. The photographer, Ruban Nielson, also got some excellent concert photos. They have about 8K followers. Swifitswift - Richard Swift, currently in The Shins, is a freak (in a good way). Her portfolio on Instagram is essentially a amalgamation of weird black and white photos of every aspect of her life. He seems to be a fan of distorted photos as well. She is based in central Oregon and has over 25K followers. Aasm – Cat Power is also weird. A lot of his photos are sexually bizarre, which we're fine with. He seems to have a strange obsession with random body parts. The photos are often black and white or sepia. He only has about 5K followers. Come on, lots of people. Questlove - He is the drummer for The Roots and must be your hero. She's smart, closet sharp, and has a cool Instagram account. She appeared to be taking photos as she left, jet-setting around the world. He has almost 250K followers. Our trying to figure out how she took this handleless selfie... Snoopdogg – Should we explain further? It's Snoop Do-Lion, or whatever. She's been famous since the beginning of time, so she certainly has over 2 million followers. Let's keep an eye on him. He.
